

VIVIENNE FAN

Auckland, NZ | +64 274796608 | fanweiwei3456@gmail.com | [LinkedIn](#)

PROFILE

Master of IT student with a Computer Science background and hands-on experience in web development, software testing, and collaborative team projects. Strong problem-solving skills, attention to detail, and a willingness to learn new technologies. Comfortable working in team environments and supporting business systems through testing, troubleshooting, and continuous improvement.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, C++, HALCON

Web Technologies: HTML, CSS, React, Node.js, REST APIs

Databases & Tools: PostgreSQL, MySQL, Git, Linux, Virtual Machines

Testing Tools: Postman, JMeter, LoadRunner

EDUCATION

University of Auckland, Master of Information Technology Mar 2026 – Expected Jul 2027

Anhui Institute of Information Technology, Bachelor of Engineering in Computer Science and Technology
Sep 2019 – Jun 2023

PROJECTS

Explorer City Web Application – CityQuest Mar 2026 – Jun 2026

- Collaborated in a **6-person Agile team** to develop a location-based web application supporting challenge discovery, user progression, and location-based interactions.
- Developed challenge list and challenge detail views using React and TypeScript, integrating frontend components with backend APIs to support user-facing functionality.
- Implemented XP/level-up and badge notification features by connecting frontend workflows with backend services and API endpoints.
- Conducted frontend testing, API validation, troubleshooting, and defect investigation to improve application reliability and support stable feature deployment.
- Worked within Agile sprints using GitHub, Kanban boards, code reviews, and team coordination practices.

Software Testing Case Study – Jianshu Mobile Application | Team Leader Updated Mar 2026

- Designed, executed, and documented **433 test cases** covering core functional scenarios based on requirements and feature workflows.
- Performed functional and non-functional testing (usability, compatibility, installation).
- Logged and analysed defects, identifying **9 issues** across key modules.
- Produced structured test artefacts, including test plan, test cases, defect reports, and test reports.
- Coordinated a team of **5 members** to manage testing progress and deliver project documentation.
- [Testing Portfolio \(Notion\)](#)

Spring Boot E-commerce Web Application | Capstone Project May 2023

- Developed a Spring Boot and MySQL e-commerce web application supporting user authentication, product management, and customer-facing shopping workflows.
- Performed testing, debugging, and database integration activities throughout development to improve application functionality and reliability.

PROFESSIONAL EXPERIENCE

Computer Vision Intern | Wuhu Xin'an Intelligent Equipment Co., Ltd., China Sep 2025 – Nov 2025

- Contributed to machine vision defect detection projects using HALCON in manufacturing environments.
- Supported image processing validation and testing activities for industrial quality control applications.

QA Intern | Kunshan Jiakai Electronic Technology Co., Ltd., China Jun 2022 – Dec 2022

- Performed functional, API, and performance testing using Postman, JMeter, and LoadRunner.
- Identified and documented software defects, supported regression testing, and contributed to quality assurance activities across multiple projects.

Volunteer | Asian Family Services (AFS), Auckland 27 Jun 2026

- Assisted attendees by providing information, language support, and facilitating communication between participants and service providers.
