PROFILE

Master of Information Technology student at the University of Auckland with a Computer Science background, currently working as an IT Intern at a local company with practical experience in software development, software testing, e-commerce operations, and collaborative team projects. Passionate about applying technology to solve real-world problems and eager to contribute to multidisciplinary teams.

EDUCATION

University of Auckland, Master of Information Technology	Mar 2026 – Expected Jul 2027
Anhui Institute of Information Technology, Bachelor of Engineering in Computer Science and Technology	China, Sep 2019 – Jun 2023

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, C++, HALCON
Frameworks & Technologies: React, Node.js, Spring Boot, REST APIs, HTML/CSS
Databases: PostgreSQL, MySQL
Developer Tools: Git, Linux, Virtual Machines
Testing Tools: Postman, JMeter, LoadRunner

INTERNSHIP EXPERIENCE

IT Intern | Oak Furniture Store, Auckland, New Zealand Jul 2026 - Present

- Maintained the administration and ongoing development of a live Shopify-based e-commerce website, including website configuration, content updates, and third-party app integration for day-to-day business operations.
- Processed customer orders across Shopify, Xero, and internal inventory systems, assisting with invoice generation and order fulfilment workflows.
- Participated in cross-functional discussions on business system migration, including historical data migration and new system implementation planning.

Computer Vision Intern | Wuhu Xin'an Intelligent Equipment Co., Ltd., China Sep 2025 – Nov 2025

- Developed HALCON-based image processing algorithms for glass defect and thickness inspection in industrial machine vision systems.
- Conducted algorithm testing and parameter tuning to improve detection accuracy and measurement consistency.

QA Intern | Kunshan Jiakai Electronic Technology Co., Ltd., China Jun 2022 – Dec 2022

- Performed functional, API, and performance testing using Postman, JMeter, and LoadRunner.
- Identified and documented software defects, supported regression testing, and contributed to software quality assurance activities across multiple projects.

SELECTED PROJECTS

Explorer City Web Application – CityQuest | Agile Team Project (6 members) Mar 2026 – Jun 2026

- Developed challenge list and detail views using React and TypeScript, integrating frontend components with backend REST APIs.
- Implemented XP and badge notification features through frontend-backend API integration.
- Developed and executed frontend test cases using mock data and manual testing to verify challenge check-ins, location-based features, XP progression, and badge unlocking.
- Worked within Agile sprints using GitHub, Kanban boards, code reviews, and team coordination practices.

Spring Boot E-commerce Web Application | Capstone Project May 2023

- Developed a Spring Boot and MySQL web application supporting common e-commerce workflows.
- Implemented backend features, integrated MySQL databases, and performed testing and debugging.

ADDITIONAL EXPERIENCE

Volunteer | Rural Wellbeing Expo, Asian Family Services (AFS), Auckland 27 Jun 2026

- Supported multilingual communication between attendees and health service providers during a community health event.
