Personal Statement

IT student interested in software development and software testing, with hands-on experience applying technical skills and learning new technologies to solve practical problems. I value learning by doing and improving solutions through feedback and iteration. Seeking an internship where I can contribute my existing skills while continuing to develop through real-world software engineering experience.

Skills

Development: JavaScript/TypeScript, React, Python, REST APIs, Git/GitHub

Testing & QA: Functional, regression and performance testing, test case design, Postman, JMeter

Web & Data: Shopify Liquid, SQL, PostgreSQL/MySQL

Computer Vision: HALCON/HDevelop

Relevant ICT Experience

Oak Furniture Store

Jul 2026 – Aug 2026

IT Intern | Auckland, New Zealand

- Defined an implementation structure by analysing the live Shopify storefront architecture, decomposing theme components, and mapping feature requirements to appropriate layers before coding.
- Implemented configurable and responsive storefront behaviour by separating content logic, presentation, and interaction across Liquid, CSS, and JavaScript according to the planned structure.
- Validated custom features through Shopify previews and Chrome DevTools across desktop and mobile breakpoints, confirming expected responsive behaviour and interactions.
- Identified two 404 errors on the live Shopify storefront, traced them to stale URLs, and reported the findings to the manager, leading to their subsequent resolution.

Wuhu Xin'an Intelligent Equipment Co., Ltd.

Sep 2025 – Nov 2025

Computer Vision Intern | China

- Analysed and tested an existing HALCON glass-inspection workflow using ROI extraction and threshold segmentation, gaining practical experience with industrial image-processing workflows.
- Investigated camera-position changes in HDevelop and identified how target shifts outside a predefined ROI could affect C-angle thickness detection, strengthening my understanding of ROI design and inspection reliability.

Kunshan Jiakai Electronic Technology Co., Ltd.

Jun 2022 – Dec 2022

QA Intern | China

- Led a 4-person QA team by planning test activities, allocating tasks, tracking execution progress, and coordinating defect reporting throughout the testing cycle.
- Contributed to functional and performance testing across 916 test cases, supporting the identification and documentation of 98 defects and executing performance tests with JMeter and LoadRunner.

Selected Projects

KindKai | AI Food Rescue Dispatcher

Aug 2026 – Present

Aotearoa AI Hackathon | Team Caffeine

- Co-defined the KindKai solution through research, team ideation, and mentor feedback, mapping roles in the food-rescue process and focusing the concept on matching surplus food with suitable recipients.

- Drove MVP scoping by prioritising the core matching/rematching loop over non-essential features, then co-prototyped a working demo with Python, FastAPI, Google ADK, and React.
- Continued developing KindKai based on KiwiHarvest feedback, refining the matching workflow around real-world operational constraints and decision-making needs, with the team pitch also progressing to Woolworths through the hackathon organiser.

CityQuest | Explorer City Web Application

Mar 2026 – Jun 2026

Agile Team Project (6 members)

- Provided React and TypeScript challenge list/detail views and progression feedback by integrating frontend components with backend APIs and using check-in responses to surface XP, badge, and level updates.
- Delivered tested frontend functionality across the challenge workflow by validating challenge views and API responses, testing different radius conditions, and verifying inside/outside-radius behaviour and resulting XP and badge state changes.
- Collaborated in a six-member Agile team, coordinating tasks through a shared Kanban board and reviewing changes through feature branches and pull requests.

Education

Master of Information Technology, University of Auckland

Mar 2026 – Expected Jun 2027

Bachelor of Engineering in Computer Science and Technology, Anhui Institute of Information Technology

Sep 2019 – Jun 2023

Professional & Community Involvement

Mentoring: AWS She Builds Mentorship Program (Mentee); CITA Mentor Circle; Summer of Tech Mentor Circle

Community: Asian Family Services Rural Wellbeing Expo (Volunteer, English–Chinese support)

Teaching: Teaching Assistant, Angli Education Centre, China (mathematics support and parent communication)

Hobbies & Interests

Swimming, boxing, tech podcasts
